RESIDENTS REMINDED TO WATCH FOR CONSTRUCTION EQUIPMENT WITHIN LOCAL STREETS

The California Department of Transportation (Caltrans) reminds residents and motorists that ***Viking Construction*** continues construction of a \$4 million auxiliary lane improvement project within the City of Fresno. The project limits for this project are from the Bullard Avenue overcrossing to the Herndon Avenue undercrossing along northbound State Route 41.

Active construction will begin behind concrete k-railing at the northbound SR 41 off-ramp from 6:00 a.m. until 5:00 p.m. each day. **However, in order to safely access the active worksite, residents are being notified that construction vehicles and equipment will be accessing the work site area through a freeway access gate located just east of the project for approximately the next four to six weeks.** This improvement project is anticipated to be completed in summer 2011. (Schedule subject to change due to unforeseen contractor operations).

Caltrans would like to thank the residents who live near the current construction site for their patience during this improvement project. Residents are advised to watch for slow moving construction equipment and drive with extra care and to “Slow for the Cone” zone at all times.

For further project information, please contact the Public Information Office at the number listed above.
